24. Description of Change: (use additional Sheets if necessary) The sudo freeware package was required for a time in order to allow DAAC operators to mount tape devices on the DDIST GUI. The ECS custom code has been changed so as not to require the use of sudo.						
25. Proposed Solution: (use additional sheets if necessary) Remove sudo from the baseline as it is no longer required by ECS custom code. NOTE: sudo may become a DAAC-unique extension if required by a particular DAAC. This CCR only submits for the removal of the package from the ECS-wide baseline list.						
26. Alternate Solution: (use additional sheets if necessary) Leave sudo on the baseline.						
27. Consequences if Change(s) are not approved: (use additional sheets if necessary) RSC is at risk (in labor dollars no allocated) to support the product.
