24. Description of Change: (use additional Sheets if necessary) Establish new patch map baseline for EDC, GSFC, and LaRC. Application patches and SUN, HP (Series 700), and SGI are mapped to hosts at the operational sites (EDC, GSFC, and LaRC) and incorporated into XRP. The patches are based upon the Release B SUN Solaris Patch List (911-TDA-007), Release B HP-UX 10.20 Patch List Series 700 Machines (911-TDA-007), and the Release B SGI IRIX 6.2 Patch List (911-TDA-004).						
25. Proposed Solution: (use additional sheets if necessary) The SUN, HP (Series 700), and SGI patches have been mapped to EDC, GSFC, and LaRC hosts. Supporting analysis and reasonableness checks have been done using Interrogation and discrepancy analysis results. The patch map incorporated into XRP are essential to conduct audits in support of RRR.
